

**AMENDMENTS TO THE CLAIMS**

Claim 1 (Currently Amended): A remedy with phagocytic activity of macrophages being facilitated by the incorporation into macrophages of a particle formulation of PLGA [poly(lactic acid/glycolic acid) copolymer] containing a medicament, wherein

the particle formulation of a PLGA contains rifampicin;  
the molecular weights of PLGA are between 5,000 to 10,000;  
the ratio of PLGA lactic acid to glycolic acid is 50:50 to 75:25; and  
all or part of the pathogens present in the macrophages are exterminated to vanish.

Claim 2 - 11 (Canceled)

Claim 12 (Previously Presented): The remedy according to Claim 1, further comprising at least one of PVA (polyvinyl alcohol), PEG (polyethyleneglycol), PEO (polyethylene oxide), sugar, protein, peptide, phospholipids or cholesterol.

Claim 13 (Currently Amended): The remedy according to Claim 1, further comprising at least one of PVA, PEG, PEO, sugar, protein, peptide, phospholipids, or cholesterol, ~~and~~ being a fine particle formulation wherein ~~major particle~~ diameters of great mass of the particle formulations are 1 to 6  $\mu\text{m}$ .

Claim 14 - 15 (Canceled)

Claim 16 (Previously Presented): The remedy according to Claim 1, fabricated by membrane emulsification method.

Claim 17 - 18 (Canceled)
